Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, alter the way I believe.

I think it is a good thing to call the attention of the general profession to this matter. The more conscientious of the internists will realize the value of surgical exploration for diagnostic purposes in such doubtful cases. Dr. Geo. Childs MacDonald: I believe what Dr. Huntington has said is true. I certainly think that incision should be made earlier. Early incisions do not do any harm, but if the case is put off until the man is nearly gone, the end will probably have been hastened. I have opened several abdomens in which I have found cancer where it not only involved the stomach, but also the transverse colon. In these cases there was very little to be felt from the outside, or any indication that the disease was so extensive as it proved to be. Dr. Kreutzmann, discussing the paper read by Dr. Huntington, said: I think that the points taken by Dr. Huntington and Dr. Barbat should be known among the profession. An incision, looked upon from the standpoint of the surgeon, is nothing more than an extension of the examination. In the hands of an experienced surgeon. I do not consider the incision--opening the abdominal cavity--any more dangerous than vaccination. Such an incision is made under the strictest aseptic precautions, whereas vaccination is frequently made without paying proper attention to asepsis, besides some foreign body in the virus is inoculated into the system....
