Not illustrated. 1903 Excerpt: .substitutes; it would appear that no chemist has dared to enter this domain. Moreover, this is not a matter for surprise; the substances in question consist of an assemblage of bodies whose properties are badly known, which are about equally indifferent to all reagents, and which do not represent homogeneous chemical combination, but complex mixtures, like rubber itself, of dissimilar compounds. Having had to make numerous researches in this difficult path, I was led to study a series of methods which appeared to remove, at least in part, the analytical difficulties referred to; and, although this research may be far from throwing complete light on the obscure chemistry of rubber, I nevertheless hope that it may be useful to those of my confreres who may be occupied with similar questions, and contribute to augment and improve the literature pertaining to this industry, which hitherto only presents...
